Software engineer | Backend & cloud enthousiast

Education

ENSIAS - National School of Computer Science and Systems Analysis — *Rabat, Morocco*
Engineering Degree in Software Engineering — *2025*

Professional Experience

Effyis Group — *Casablanca, Morocco*
Backend Engineer Intern — *February 2025 – August 2025*

- Architected a distributed, event-driven transaction processing progiciel using Spring Boot microservices and Apache Kafka, sustaining 1.5K+ real-time financial transactions/sec through optimized multi-threaded batch consumption
- Built a context-based qualification module mapping ISO 20022 messages to transaction cost codes via multi-dimensional analysis (jurisdiction, schemes, operation types, entry modes) for automated fee computation
- Developed Visa/Mastercard/CB interchange fee workers with Avro schema validation, PostgreSQL persistence, and Redis caching, integrated with IBM Cloud Event Streams for high-availability message streaming

Spring Boot · Java 21 · Apache Kafka · PostgreSQL · Redis · IBM Rocks · Apache Avro · IBM Cloud Event Streams · ISO 20022 · Jmeter · ELK

Ministry of Education, Preschool and Sports — *Rabat, Morocco*
Full Stack Engineer Intern — *July 2024 – August 2024*

- Developed a secure, government-compliant incident management system with automated ticket workflows
- Built cyberattack classification, risk feedback loops, and real-time compliance dashboards

Django REST · React · PostgreSQL · RBAC · ISO 27002 · Cybersecurity

Levio Business and Technologies — *Rabat, Morocco*
Full Stack Developer Intern — *July 2023 – August 2023*

- Contributed to an internal carpooling platform easing transport for remote staff attending company gatherings
- Implemented secure login, real-time ride matching, and location-based features using Google Maps APIs
- Contributed to four Agile sprint cycles, learning best practices in full-stack development and collaborative software delivery

Spring Boot · Angular · REST APIs · JWT · Google Maps API · Agile Scrum · Maven · MySQL · JIRA

Projects

SportScape – Sports Facility Management Platform — *2024*

- Architected and developed a microservices-based progiciel for sports facility discovery, booking, and management with real-time availability tracking
- Implemented domain-driven microservices — User (auth & profiles), Facility (venue catalog), Booking (reservations) — with Eureka service discovery and API Gateway routing
- Built secure authentication, conflict-free booking, and facility owner dashboards for efficient operations
- Developed a scalable Angular frontend with TypeScript and responsive UI for seamless venue discovery and booking
- Containerized and deployed the platform using Docker and Kubernetes for automated scaling and high availability

Spring Boot · Spring Cloud · Jwt · Microservices · Angular · TypeScript · PostgreSQL · Docker · K8s · Eureka · API Gateway

Mini Pascal Compiler — *February 2024*

- Developed a complete Pascal compiler in C, covering lexical analysis, syntax parsing, semantic analysis, and P-code generation
- Implemented recursive descent parser to support variables, constants, control structures, and I/O operations
- Built a symbol table management system with type checking and semantic validation
- Created a robust error handling system with line-number tracking and descriptive error messages
- Generated P-code intermediate representation with support for arithmetic, logical, and control flow operations

C · Pascal · Compiler Design · P-code · Recursive Descent · Symbol Tables · Error Handling

Technical Skills

Full-Stack Development

Java · Spring Boot · Spring Cloud · Node.js · Python · Django · FastAPI · REST · Microservices · React · Angular · TypeScript · HTML5 · CSS3 · Bootstrap · Tailwind CSS

Databases & Messaging

PostgreSQL · MySQL · MongoDB · Redis · Apache Kafka · Apache Avro

DevOps, Cloud & CI/CD

Docker · Kubernetes · Terraform · ArgoCD · Jenkins · Git · GCP · AWS (RDS, EC2, S3) · IBM Cloud (Event Streams) · ELK Stack

Professional Certifications

Big Data Engineer Certificate — IBM • 2024
Google Cloud Fundamentals: Core Infrastructure — Google Cloud • 2024
Google Cloud Infrastructure: Foundation — Google Cloud • 2024
